SCLogic & OPEX Corporation Announce Partnership

ANNAPOLIS, MD and MOORESTOWN, NJ February 24, 2016 — SCLogic, a leading provider of campus logistics software, and OPEX Corporation, a recognized global technology leader in high-speed mailroom automation, announced today that they will be working together to provide an integrated solution of SCLogic's Intra Enterprise business process management solution with OPEX Corporation's Mail Matrix.

The two systems work together to sort and track the delivery of mail and parcels for any Fortune 500, government, or university mail center. OPEX's Mail Matrix sorts all of the pieces into designated bins based on user defined fields (i.e., name, department, and building) in a single pass. SCLogic's Intra Enterprise is used to track all of the pieces throughout the sorting process until the time of delivery to the actual recipient.

"It just makes sense for SCLogic to partner with OPEX. We are both product innovators, we share scores of clients, and are both passionate about delivering accountability for our users. It was logical to join forces and offer our customers a complete mailroom automation solution from the loading dock to the desktop," said Michael B. Saldi, President of SCLogic.

"The Mail Matrix has a proven track record of providing value to customers by offering unique, single-pass mail sorting efficiency. By partnering with SCLogic, this value now extends seamlessly beyond the physical sort process to include a completely accountable solution. Our customers will benefit from the strengths of both industry leading organizations," said Kurt Stoneking, Product Specialist at OPEX Corporation.

About OPEX Corporation

OPEX Corporation at its core is all about optimizing business processes. As a recognized global technology leader in document imaging and high-speed mailroom automation since 1973, OPEX systems have provided performance enhancing workflow solutions and cost-effective results to thousands of organizations worldwide.
